# What is Hacker | Solar ?

Hacker | Solar is a knowledge repository on all subjects related to the practical application and praxis within the Solarpunk movement.

Solarpunk is a literary, art, and social movement that understands the current state of the world in terms of climate crisis, social & economic problems, and the state of individuals and their localized communities and seeks to demonstrate possible future scenarios that address these issues. As a social movement it seeks to find and implement localized, decentralized, and distributed solutions to various problems within our current state of being.

Elements of Solarpunk seek to implement various post-scarcity solutions including:

- Food Production & Distribution
- Water Production & Distribution
- Power Production & Distribution
- Housing & Shelter
- Healthcare & Medicine
- Education

This site contains knowledge repos and how-tos regarding these various solutions. Solutions are designed to be implemented at the individual scale using current technology, both high-tech and low-tech, that is accessible to individuals or small groups.

# Layout & Search

This site is meant to be accessed in two ways:

- Intuitive layout in the form of Shelves -> Books -> Chapters -> Pages
- Search functionality that returns topics as desired

This dual layout allows for ease of access. If a person has a specific topic in mind, they can bring up all books and pages that relate to that subject via the search function. If a person wishes to discover topics that they may be unfamiliar with, the intuitive layout encourages browsing and exploration.
